

The Rising: SPIRIT

Astronomically speaking, as the earth rotates on its axis, a different degree of the sun's path around it rises above the horizon every 4 minutes, resulting in a new constellation (zodiac sign) on the ascendant approx. every 2 hours. So because of this, within the 24-hour day, any of the 12 zodiac signs will be found on this ascendant. This constant rotation is the reason why it is highly unlikely that someone will have the same sun, moon *and* rising sign as you. That every 2 hour rotation that a new ascendant is on the rise, some individual is getting his or her rising sign (as if being given a star). Magical! It is my belief that-that "star" given to us is that gift-that destiny and karma mission and purpose in life. Henceforth, the premise (and conclusion) of what this book is all about...

Astrologically speaking, the rising/ascendant sign is the sign that was ascending the horizon at the month, date and time you were born. It is the hidden you, but it is the first impression that you give to others-a subtly dominate part of your personology and outward manifestation of the "you" that the world perceives. Also, the ascendant is the sign that has very much to do with the way you express yourself (if you discover your karma mission and purpose in life-which is what this book is written to help you find). It is your niche' sign by which your natural talent, skill & ability are found-where your karma mission to lead, organize or communicate will exude. As explained at the beginning in the section:

"Methodology: The Algorithm for Determining Your Purpose in Life," the reason for focusing on this ascendant sign is to provide you with a full understanding of your rising sign's uniqueness (separate from your sun and moon sign) & how by way of it; your destiny is to be fulfilled-should you choose to live life through it (otherwise-by free will or by default). Let's find your rising sign:
